#### IGas Energy PLC

IGas Energy PLC is pleased to announce that the Environment Agency has issued a mining waste permit for the proposed drilling of two wells at Springs Road in the parish of Misson, North Nottinghamshire. The permit has been issued after extensive review of the company's plans and arrangements, and following full public consultation.

Commenting on the announcement IGas CEO Stephen Bowler said:

"This is an important step towards having the necessary permissions in place to carry out exploratory drilling at Springs Road in order to evaluate the geology of the area.

Such a detailed review by the regulator alongside the public consultation demonstrates that, as we have committed, our proposed exploratory operations will be carried out safely and in an environmentally responsible manner."
